Science and society in a time of crisis

An event co-organized by AISUK, AMBIT and ICI

PROGRAMME

The extraordinary events we have witnessed over the last three years have forever changed the way we perform, communicate, and appreciate science as well as the manner of our wider social interactions. These have also been times of great opportunities and expectations for Italian science, thanks to unprecedented investments in infrastructures and programmes. We will explore these themes with the help of distinguished speakers, providing the backdrop for the prize award ceremony for early career researchers.

Title	Speaker	Notes
13.30	<i>Doors open</i>	
14.00	Welcome	Katia Pizzi (ICI) – Roberto Buizza (AMBIT) – Carla Molteni (AISUK)
